

SOCIETY OF PETROLEUM ENGINEERS
KWAME NKRUMAH UNIVERSITY OF SCIENCE AND TECHNOLOGY CHAPTER
2025 ANNUAL REPORT.

INTRODUCTION

The Society of Petroleum Engineers (SPE) KNUST Student Chapter serves as a pillar of innovation, collaboration, and professional excellence. This annual report highlights the dynamic journey of our chapter from January 2025 to September 2025, reflecting a year of transformative initiatives, knowledge exchange, and community involvement as we celebrated our 15th Anniversary. Through engaging programs such as orientations, technical seminars, community outreach, international partnerships, webinars, and symposiums, we have enabled students to refine their skills, address industry challenges, and promote meaningful progress. As we honor these accomplishments, we also celebrate the smooth transition to a new leadership team, ready to advance our legacy in the 2025 academic year.

ACKNOWLEDGEMENT

The executive body of the SPE KNUST Student Chapter extends heartfelt gratitude to the Almighty God for His unwavering strength and guidance throughout our tenure.

We express profound appreciation to our esteemed faculty advisor, Dr. Stephen Adjei, for his steadfast mentorship, invaluable advice, and unwavering support, always welcoming us with open doors. To the section executives, we are deeply thankful for your tireless efforts and dedication, which have been instrumental in making this administration a resounding success. Special recognition goes to Mr. James Allotey for his inspiring guidance and generous financial support during his visit to the chapter. Finally, to the entire chapter executives and membership body, we sincerely thank you for embracing and championing the vision we set forth, driving our collective success.

ACTIVITY HIGHLIGHTS

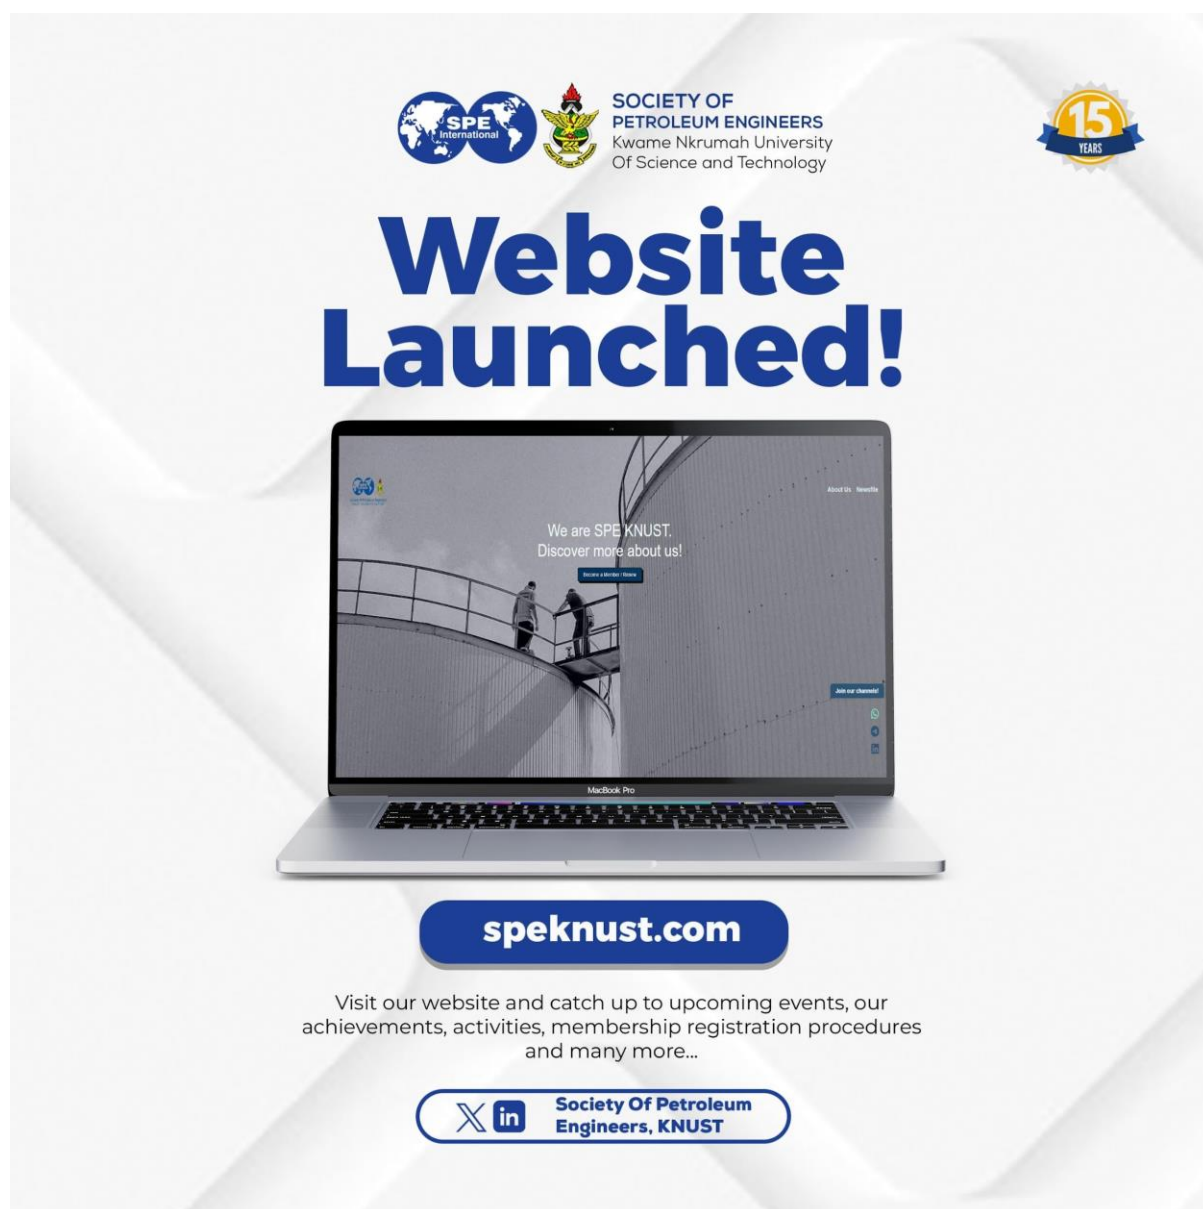

FRESHMEN ORIENTATION, January 2025

As part of SPE KNUST commitment to fostering undiluted participation in SPE activities in the chapter, a comprehensive orientation was organized to create the awareness of SPE and increase membership by recruiting interested students especially for the newly admitted students. Through this new members were registered and the awareness of SPE was created across several departments under the college of Engineering.

SPE KNUST WEBSITE LAUNCH, February,2025

To enhance seamless communication and facilitate the activities of the chapter, a website was launched where members can renew their membership, interested applicants can join the chapter and also members are up to date on industry trends and development. The SPE KNUST website provides an integrated platform where members can register, renew memberships, and explore all activities and achievements on energy all in one place.

The graphic is a white background with a subtle geometric pattern. At the top, it features the SPE International logo (two blue circles with a globe), the KNUST crest (a red and yellow shield with a torch), and the text 'SOCIETY OF PETROLEUM ENGINEERS Kwame Nkrumah University Of Science and Technology'. To the right is a gold '15 YEARS' anniversary badge. The main headline 'Website Launched!' is in large, bold, blue font. Below it is a laptop displaying the website's homepage, which has a background image of two people on an industrial walkway and text that reads 'We are SPE KNUST. Discover more about us!'. Below the laptop is a blue button with the text 'speknust.com'. Underneath the button is a paragraph: 'Visit our website and catch up to upcoming events, our achievements, activities, membership registration procedures and many more...'. At the bottom is a blue button with the X and LinkedIn logos, followed by the text 'Society Of Petroleum Engineers, KNUST'.

ONLINE WEBINAR ON MAXIMIZING STUDENT MEMBERSHIP IN SPE, February, 2025

As part of SPE KNUST 15th Anniversary celebrations, an exclusive cross chapter webinar was organized on Maximizing Your Student Membership in SPE.

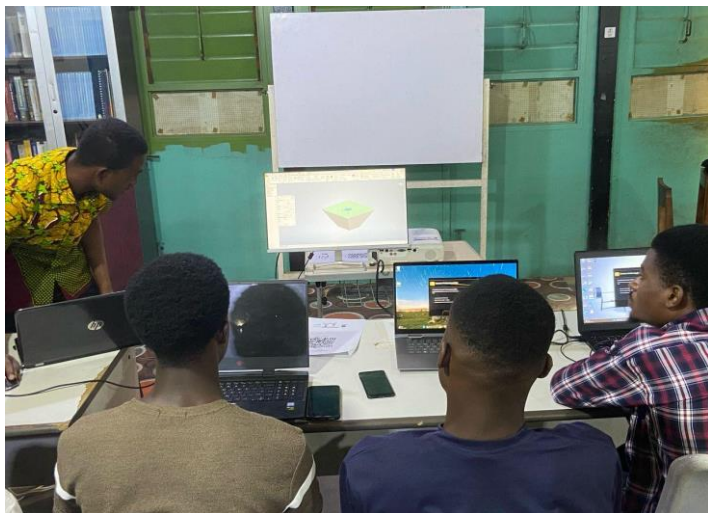

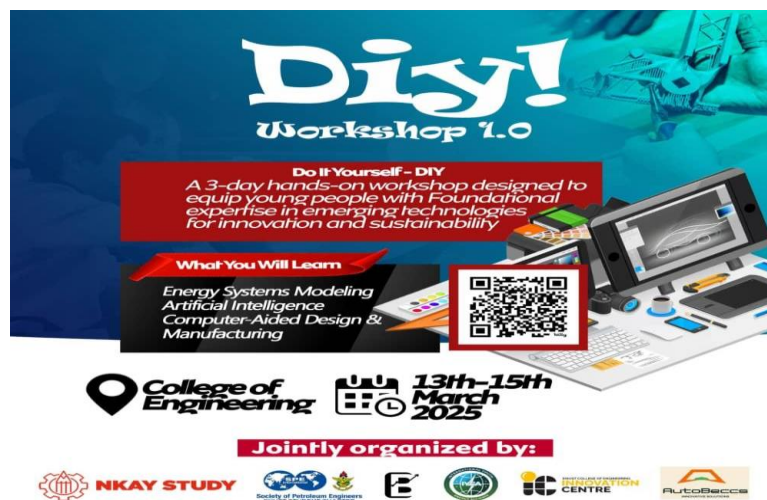

The webinar highlighted the benefits of SPE student membership, how to leverage your SPE student membership for career growth and networking.

Finally, it was an opportunity for students to meet and connect with fellow students from different SPE chapters.

SPE KNUST COLLABORATIVE TECHNICAL WORKSHOP, March,2025

SPE KNUST was offered a slot to partner with NKAY Study on campus to organize a 3-day technical workshop in March. It focused on equipping members with skills in Energy Systems Modelling, Artificial Intelligence and Emerging Technologies and Computer Aided Design (CAD). It began with a pre workshop webinar where our Vice President made a presentation. The workshop's primary objective was to expose members to these fields and the opportunities available.

ENERGY4ME ,June 2025.

Through an innovative partnership with the IEEE Computer Society, KNUST, the SPE KNUST Student Chapter introduced students at Armed Forces Senior High School to cutting-edge technologies in the energy sector on June 14, 2025. Through interactive, hands-on workshops in programming, 3D animation, and virtual reality, we engaged with inquisitive young minds and explored promising career opportunities in STEM. The students' enthusiasm and eagerness were genuinely inspiring. This initiative powerfully underscored that the future of technology and energy is in capable hands.

SAFETY SYMPOSIUM, July 2025

At the SPE x GESA x WAIMM Safety Symposium, we delved into critical safety practices vital for every engineer! Through hands-on fire extinguisher training, recognizing the value of transparency in safety reporting, and unexpected lessons like the critical role of headrests and headlights, the day was packed with valuable insights and engagement. This symposium underscores the chapter's dedication to bridging the divide between academia and industry, equipping members with the essential skills and knowledge to excel in any professional environment.

SWITCH ON MOVIE SCREENING, August 2025

On August 8, 2025, the SPE KNUST Student Chapter, in partnership with the Switch Alliance Network, Switch Energy Alliance, and AYEN, proudly hosted Ghana's inaugural Switch On film screening at Kwame Nkrumah University of Science and Technology, themed "Tackling Africa's Energy Poverty: The Role of The Young Graduate." This impactful documentary served as a rallying call for young and aspiring graduates to address Africa's critical energy challenges, highlighting stark realities such as families dependent on kerosene lamps, students studying under inconsistent lighting, and clinics struggling without reliable power. The event underscored a powerful message: energy poverty extends beyond infrastructure, encompassing issues of equity, education, and empowerment, urging the next generation of leaders to drive change through technology, policy, and grassroots initiatives.

HANDING OVER AND TRANSITION, September, 2025

After an incredible journey, we are excited to share that we are passing the baton to our newly appointed executives for the 2025/2026 academic year. It has been an honor to contribute to the Society of Petroleum Engineers - SPE Ghana Section as student volunteers working alongside such talented individuals. These individuals bring a wealth of experience and fresh perspective to the role, and we are confident they will continue to drive success and innovation. Please join us in welcoming them as they take on this new challenge.
