

1. Overview: Society of Petroleum Engineers (SPE) – KNUST Chapter

The Society of Petroleum Engineers (SPE) KNUST Chapter remains a dynamic student-led body committed to bridging academia with industry in the oil and gas sector. As an affiliate of SPE International and the SPE Ghana Section, the chapter fosters innovation, technical excellence, and leadership development through diverse programs. From competitions and outreach to mentorship and technical events, SPE KNUST equips its members with tools to thrive in a global energy landscape.

2. James Allotey Okai, Programs Chair of SPE Ghana Section, Visits SPE-KNUST Chapter

The SPE-KNUST Chapter had the distinct honour of hosting Mr. James Allotey Okai, Programs Chair of the SPE Ghana Section, during a highly impactful visit in 2025. As part of his guest lecture engagement, Mr. Okai held an in-depth session with the Chapter's executive body, emphasizing the crucial role of student chapters in advancing the mission of the Society of Petroleum Engineers.

The meeting was rich in discussion, covering mentorship, leadership, professional growth, and the importance of student involvement in SPE's core initiatives. Mr. Okai's visit not only inspired the leadership team to aim higher but also provided clarity on how student chapters can leverage SPE resources to drive meaningful change. In a powerful show of support, he concluded his engagement with a generous donation to assist the chapter in organizing its upcoming programs and events.

3. SPE 2024 PetroBowl Contest

SPE KNUST proudly participated in the 2024 PetroBowl regional qualifier, showcasing exceptional teamwork, technical knowledge, and confidence. PetroBowl is one of SPE International's flagship academic competitions, where students answer questions on petroleum engineering, energy policies, and global industry trends.

SPE KNUST proudly secured **third place** at the 2024 PetroBowl Regional Qualifier, marking a significant achievement for the chapter. Competing against some of Africa's top petroleum engineering schools, the team demonstrated exceptional technical depth, teamwork, and quick-thinking under pressure.

The KNUST team exhibited strong performance, reflecting their dedication and preparation. The experience not only strengthened team collaboration but also positioned KNUST among leading African institutions fostering academic and technical excellence in petroleum engineering.

4. SPE KNUST Chapter 2025 Programs & Activity Line-up

The SPE KNUST Chapter's 2025 calendar reflects a strategic commitment to empowering its members academically, professionally, and socially. The planned activities for the year aim to build capacity, inspire leadership, and bridge the gap between students and industry.

Highlights of the 2025 Program Line-up Include:

- **Fresher's Orientation** (January): Welcoming new members with an introduction to SPE's global vision and opportunities.
- **SPE 4 All (Awareness Week)** (2nd–3rd week of January): Promoting SPE membership and values across campus.
- **Membership Renewal Drive** (Nov–Dec 2024 & Jan 2025): Ensuring continued member engagement.
- **Energy4Me Outreach** (March & June): Educating SHS students on energy, sustainability, and STEM pathways.
- **Personal Branding Webinar** (February): Helping young engineers build a strong professional identity.
- **Career Fair & Workshop** (July): Linking students to career opportunities and mentorship.
- **Biweekly PetroBowl Trivia & Energy News**: Enhancing knowledge through informal yet impactful learning.
- **Empowerment Webinars (Bi-monthly)**: Virtual sessions to boost technical and soft skills.

With this diverse line-up, SPE KNUST remains committed to fostering a well-rounded student experience that supports both academic and professional excellence.

5. SPE KNUST Represents Ghana at 2025 Students Paper Contest – SAASC, Bayero University, Kano

At the 2025 SPE Africa Annual Students Congress (SAASC) held at Bayero University in Kano, Nigeria, the SPE KNUST Chapter proudly represented Ghana in the Student Paper Contest, one of the most prestigious academic platforms on the African SPE calendar.

Representing the chapter was **Nii Sowah Laryea-Adjei**, who presented a ground breaking research paper titled:

“LNUQNet: A Hybrid Deep Learning Model for Lithology Prediction with Uncertainty Qualification and Attention Mechanism.”

His paper introduced a novel AI-driven approach to improve subsurface lithology prediction, combining deep learning with uncertainty quantification and attention mechanisms; key innovations aimed at enhancing decision-making in reservoir characterization.

Nii Sowah’s presentation captivated both the panel and the audience, showcasing KNUST’s academic strength and the chapter’s commitment to excellence in research and innovation. Beyond competition, the Congress offered a valuable space for cultural exchange, professional networking, and regional collaboration.

SPE KNUST’s presence at SAASC 2025 reaffirms its role as a thought leader and academic powerhouse among African student chapters.

6. KNUST Embarks on Energy Forum at Armed Forces Senior High School

As part of its community engagement drive, the SPE KNUST Chapter organized an impactful Energy Forum at Armed Forces Senior High School in Kumasi. The forum introduced senior high school students to the fundamentals of energy, the global energy transition, and career paths in petroleum and energy engineering.

With engaging presentations and interactive sessions, the event educated and inspired future engineers, while promoting awareness of global energy challenges. It also reinforced the chapter’s commitment to STEM advocacy and sustainability at the grassroots level
